## Q35. TIMING.

## Q35. TIMING.

TOTAL
Q35. TIMING
Supporters of the proposal say U.S. water
infrastructure is outdated and no American should have to face severe health risk from water contaminated by lead pipes. They say the current EPA rule, which allows utilities to leave most lead pipes in use and lets highly lead-
contaminated systems more than 30 years of continued lead pipe use, falls short We need a better plan that will solve this issue sooner.
opponents of the proposal say access to safe water is important, but we already have a rule in place that will replace lead pipes if they are found to cause ongoing lead contamination above the EPA's acceptable level. They say the current rule puts the U.S. on a path to safe water for all without overburdensome government regulations and unnecessary costs.

Q35. TIMING
Supporters of the proposal say U.S. water
infrastructure is outdated and no American should have to face severe health risks from water contaminated by lead pipes. They say the current EPA rule, which allows utilities to leave most lead pipes in use and lets highly lead-
contaminated systems more than 30 years of continued lead pipe use, falls short. We need a better plan that will solve this issue sooner.
Opponents of the proposal say access to safe water is important, but we wlready mpore a rule in place that will replace lead pipes if will replace lead pipes they are found to cause above the EPA's acceptable above the EPA's acceptable level. They say the curr
rule puts the U.S. on a rule puts the U.S. on a path to safe water for a
without overburdensome without overburdensome government regulations and unnecessary costs.

Q37. UTILITY RESPONSIBILITY Supporters of the proposal who say that it was th water utilities who
installed or approved of these lead pipes years ago, and it should be their responsibility to pay for replacing them
Opponents of the proposal who say forcing water utilities to replace all lead pipes, regardless of location or levels of lead exposure, is unnecessary and will cause many utilities to go bankrupt or raise prices on consumers.

## 238. PRIVATE PROPERTY.

Q38. PRIVATE PROPERTY
Supporters of the proposal who say that exposure to lead poses serious health risks that cannot be
ignored, and that's why any lead pipe replacement plan should pay for $100 \%$ of the cost to replace the lead pipes providing water to homes, no matter whether the pipes are under public property or under someone's front yard. Otherwise, low income families and people who rent will still have to drink water from these lead pipents of the proposal who say replacing all lead pipes will burden water utilities, and that they shouldn't be required to shouldn't be required to remove the part of a lead private property or under private property or under
someone's front yard - the someone's front yard - the say individual homeowns should pay for that.

| Q39. JUSTICE |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| Supporters of the proposal who say U.S. water infrastructure is severely outdated, especially in lowincome areas and communities of color who are disproportionately impacted by contaminated water. They say access to safe drinking water should not be determined by how much money someone makes. | 69\% | 76\% | 60\% | 72\% | 71\% | 61\% | 68\% | 66\% | 72\% | 68\% | 74\% | 4\% | 86\% | 64\% | - | 83\% | 75\% | 43\% | 81\% |
| Opponents of the proposal say access to safe water is important, but we already have a rule in place that will replace lead pipes if they are shown to cause lead contamination in excess of the EPA's acceptable level. This proposal is simply a radical transfer of wealth from working Americans to liberal ideologues who will hurt American consumers in the name of phony environmental justice. | 31\% | 24\% | 40\% | 28\% | 29\% | 39\% | 32\% | 34\% | 28\% | 32\% | 26\% | 96\% | 14\% | 36\% | 100\% | 17\% | 25\% | 57\% | 19\% |
