

Greetings

FROM WHEN AMERICA WAS "GREAT."

Dear President Trump,

I'm outraged at your actions that will devastate our environment, set us back decades in the fight against climate change, threaten our national security, and deprive millions of American workers of jobs in the new, booming clean energy economy.

I call on you to reverse course and cancel plans to:

- Slash the EPA's budget and staff, undermining the agency's ability to protect our environment;
- Dismantle the Clean Power Plan and other critical measures to save our climate and build a clean energy future;
- Build the dangerous, climate-busting Keystone XL tar sands pipeline;
- Weaken or eliminate fundamental protections for clean air, clean water, and public health.

Your anti-environment agenda will face a growing movement of people who refuse to leave future generations to pay the price for this disregard for our air, water, climate, and health. Please reverse course immediately.

Sincerely,

GENUINE POSTCARD. NRDC 40 WEST 20TH ST 10011 NEW YORK, NY
