

Catawba Wateree Watershed Management Group (CWWMG)

Not a regulatory agency, but rather a cooperative 501(c)(3) non-profit group formed by and comprised of 18 public water utilities and Duke Energy, each of which operate water intakes from the Catawba River.

This group has developed a master plan for water conservation, which identifies water auditing and loss control as a best practice. The group is presently receiving training on the AWWA M36 water auditing methods, and will be moving towards an annual water audit using the AWWA Free Water Audit Software over the next couple years.
